Hydraulic Injection First Aid Guide

A first aid guide for hydraulic fluid injection injuries that tells workers what to do and not do in the first minutes before they reach medical care.

Farm / unit: _____ Date: _____ By: _____

1. Treat any injection as an emergency
2. Stop work and shut the system down
3. Do not wait to see if it gets worse
4. Call emergency services or go to the hospital
5. Tell staff the fluid was high pressure
6. Bring the fluid name or data sheet if possible
7. Do not cut or squeeze the area yourself
8. Keep the person calm and still
9. Report the incident afterward

YOUR NOTES

TIP Share this guide with all workers and keep it near the shop, and see a doctor for any suspected injection injury.
