Lime Spreader Settings Guide

A settings guide for lime spreaders, helping you record the equipment setup, product details, and test results to get an even application across the field.

Farm / unit: _____ Date: _____ By: _____

1. Check spreader condition before loading
2. Note the lime source and material type
3. Check moisture and clumping condition
4. Set the gate or feed per the manual
5. Set ground speed for the field
6. Do a catch test or weight check
7. Compare results to the planned rate
8. Adjust and repeat the test
9. Record final settings and field notes

YOUR NOTES

TIP Base your lime plan on a soil test and ask your extension office to help read the results.
