Mower Conditioner Adjustment Guide

A guide to adjusting mower conditioners, listing the settings to check for clean cutting, proper conditioning, and even windrows in different crops.

Farm / unit: _____ Date: _____ By: _____

1. Read the operator's manual first
2. Check cutter bar, knives, or discs
3. Inspect and replace worn blades
4. Set cutting height for the crop
5. Adjust conditioner rolls or flails
6. Set swath width or windrow shape
7. Check header angle and float
8. Make a short test pass in the field
9. Record the settings that worked

YOUR NOTES

TIP Make one adjustment at a time and look at the cut stubble and swath to see the result.
