No-Till Drill Calibration Worksheet

A worksheet for calibrating a no-till drill, with lines for seed, settings, test results, and field notes to help you hit the seeding rate you want.

Farm / unit: _____ Date: _____ By: _____

Drill make and model _____

Crop and seed variety _____

Seed lot or bag tag _____

Seed size or test weight source _____

Gate or meter setting used _____

Catch test method and result _____

Adjustments made _____

Field conditions at seeding _____

Final setting to use _____

NOTES / CALCULATIONS

TIP Use the drill's chart as a starting point, then do a catch test and adjust, because seed type changes the result.
