Nozzle Selection & Replacement Guide

A guide to selecting and replacing sprayer nozzles, walking through the factors to match a nozzle to the product, the job, and the equipment.

Farm / unit: _____ Date: _____ By: _____

1. Read the product label for nozzle guidance
2. Note the spray target and crop stage
3. Choose a nozzle type for the job
4. Match nozzle to boom spacing and height
5. Check flow rate and droplet size chart
6. Check the pressure range of the nozzle
7. Replace nozzles as a full set
8. Calibrate after any replacement
9. Record nozzle type and date

YOUR NOTES

TIP Use the nozzle maker's charts and follow the product label for droplet size and application rules.
