Row Crop Cultivator Adjustment Guide

An adjustment guide for row crop cultivators, helping operators set gangs, shields, sweeps, and guidance so cultivating is accurate and protects the crop.

Farm / unit: _____ Date: _____ By: _____

1. Read the cultivator manual first
2. Match the tool bar to the row spacing
3. Set the gangs level front to back
4. Set sweeps and shovels for the crop stage
5. Adjust shields to protect young plants
6. Set depth and soil throw
7. Make a short test pass in the field
8. Check results and adjust
9. Record the settings that worked

YOUR NOTES

TIP Make test passes slowly and look closely at crop rows before you commit to full speed.
