Slow-Moving Vehicle Sign Placement Guide

A guide to placing slow-moving vehicle signs on farm equipment so the sign is visible, clean, and mounted at the right spot for traffic on public roads.

Farm / unit: _____ Date: _____ By: _____

1. Check your state rules for SMV sign use
2. Choose a mounting spot at the rear
3. Sign must be centered on the machine
4. Keep the sign upright and level
5. Make sure nothing blocks the sign
6. Use a mount that is solid and stable
7. Replace faded or damaged signs
8. Move or cover the sign when off the road
9. Add reflective tape and lights

YOUR NOTES

TIP Clean and check the sign before each road trip, and confirm requirements with your state highway or agriculture agency.
