Farm Value-Added Product Cost Calculator

A farm value-added product cost calculator worksheet for producers adding up ingredients, packaging, labor, and overhead for a processed product. It supports clearer price setting.

Farm / unit: _____ Date: _____ By: _____

Product name _____

Batch size _____

Ingredient costs _____

Packaging cost _____

Labels and printing _____

Labor time and cost _____

Kitchen or facility cost share _____

Fees and testing costs _____

Total cost per unit _____

NOTES / CALCULATIONS

TIP Recalculate whenever ingredient or packaging prices change so your margins do not slip without notice.
