Action Threshold Guide

Use this action threshold guide to learn what an action level means and how to write down the levels your extension service recommends for each crop and pest in your fields.

Farm / unit: _____ Date: _____ By: _____

1. Define action level in your own words
2. List your main crops and pests
3. Look up recommended levels from extension
4. Record each level in this guide
5. Note the sampling method that applies
6. Record crop stage when the level applies
7. Decide what action follows
8. Review levels each season

YOUR NOTES

TIP Always take threshold numbers from your state extension, since they vary by crop, region and growth stage.
