Adjuvant Selection Guide

This adjuvant selection guide helps applicators decide whether an adjuvant is needed and pick one that suits the product label, with steps to record the choice and results.

Farm / unit: _____ Date: _____ By: _____

1. Read the product label for adjuvant advice
2. Identify the spray goal
3. Pick the adjuvant type needed
4. Check adjuvant label directions
5. Confirm mixing order
6. Run a jar test
7. Record the adjuvant used
8. Review results after application

YOUR NOTES

TIP Use only adjuvants the pesticide label allows, and keep adjuvant records with your spray records.
