Biological Weed Control Guide

Use this biological weed control guide to learn about approved living agents such as insects or grazing animals, and record plans and results for any weed you target.

Farm / unit: _____ Date: _____ By: _____

1. Name the target weed and site
2. Check if approved agents exist
3. Contact extension or state agency
4. Review release or grazing rules
5. Plan timing and monitoring
6. Record the source of any agent
7. Track weed response over time
8. Plan backup control methods

YOUR NOTES

TIP Never bring in biocontrol agents without approval from your state agriculture agency or extension.
