Degree Day Calculation Worksheet

This degree day calculation worksheet helps you track daily heat accumulation to predict when pests emerge, with lines for temperatures, base values and running totals taken from local guidance.

Farm / unit: _____ Date: _____ By: _____

Location and weather station _____

Pest or crop being tracked _____

Start date for counting _____

Base temperature from extension _____

Daily high temperature _____

Daily low temperature _____

Daily degree days _____

Running total _____

Target stage and date _____

NOTES / CALCULATIONS

TIP Use the base temperatures and start dates published by your state extension for each pest, not generic values.
