# Field Crop Disease Management Guide

Use this field crop disease management guide to plan variety choice, rotation, residue and scouting for row crops, with steps to record what you see and decide.

Farm / unit: _____ Date: _____ By: _____

1. Choose resistant varieties
2. Plan rotation by field
3. Manage crop residue
4. Prepare a seedbed for good stands
5. Scout at key stages
6. Record disease and severity
7. Decide on treatment per label
8. Review results after harvest

## YOUR NOTES

**TIP** Compare notes with local extension disease updates so your scouting matches current regional risks.
