# High Tunnel Disease Management Guide

Use this high tunnel disease management guide to plan airflow, watering and cleanup so diseases are held back in tunnel crops where humidity can build quickly.

Farm / unit: _____ Date: _____ By: _____

1. Record the crop and tunnel
2. Open sides or vents on schedule
3. Water at the base of plants
4. Space and prune for airflow
5. Remove infected leaves promptly
6. Clean tools between rows
7. Rotate or rest tunnel beds
8. Record disease and weather notes

**YOUR NOTES**

**TIP** Vent early in the day before humidity builds, and keep notes on what you changed each time disease appeared.
