IPM Scouting Form for Orchards

This IPM scouting form for orchards helps growers record tree and fruit observations by block, tracking insect pests, disease signs and beneficial species through the season.

Farm / unit: _____ Date: _____ By: _____

Orchard block and variety _____

Scout and date _____

Tree growth stage _____

Insects found on shoots and fruit _____

Disease signs on leaves and fruit _____

Trap check notes _____

Beneficial insects seen _____

Ground cover and weeds _____

Follow-up action _____

NOTES / CALCULATIONS

TIP Scout the same marked trees each visit so you can see change over time instead of starting fresh every week.
