Pest Forecasting Tool Guide

This pest forecasting tool guide explains how to find, use and record forecasts from local models and alerts, helping growers time scouting and sprays around expected pest activity.

Farm / unit: _____ Date: _____ By: _____

1. Identify forecasts for your crops
2. Find your nearest weather station
3. Enter or confirm local weather data
4. Read the forecast output
5. Compare with field scouting results
6. Record the forecast date and result
7. Decide on scouting or action
8. Review forecast accuracy later

YOUR NOTES

TIP Treat forecasts as a prompt to scout, and confirm with field checks before you make any treatment decision.
