Pesticide Exposure First Aid Guide

Use this pesticide exposure first aid guide as a quick reference for steps to take if someone is exposed, with space to post the product label and emergency numbers.

Farm / unit: _____ Date: _____ By: _____

1. Move the person away from exposure
2. Remove contaminated clothing
3. Rinse skin or eyes with clean water
4. Check the label first aid section
5. Call poison control or emergency services
6. Keep the product label available
7. Note what and how long
8. Follow up with a doctor

YOUR NOTES

TIP Post this near the mixing area with the poison control number, and always follow the first aid directions on the product label.
