Pesticide Poisoning Symptoms Guide

This pesticide poisoning symptoms guide gives workers a quick reference for warning signs of exposure and the steps to take, with space to post the poison control number.

Farm / unit: _____ Date: _____ By: _____

1. Know the product being used
2. Watch for headache or dizziness
3. Watch for nausea or stomach upset
4. Watch for skin or eye irritation
5. Watch for breathing trouble
6. Stop work and move to fresh air
7. Call poison control or emergency services
8. Take the label to the doctor

YOUR NOTES

TIP Do not wait for symptoms to get worse, and post this guide with the poison control number near the work area.
