Regenerative Pest Management Plan

This regenerative pest management plan template outlines how soil health, diversity and habitat can reduce pest pressure, with sections to fill in for your own farm.

Farm / unit: _____ Date: _____ By: _____

Farm and goals

Soil health practices

Crop diversity and rotation

Cover crops and habitat

Monitoring methods

Action steps when pests appear

Records and review

Partners and support

TIP Start with a few practices you can manage well and record results before adding more.
