Solarization for Weed Control

This solarization for weed control guide helps you plan and record covering moist soil with clear plastic to heat it and reduce weed seed and some soil pests.

Farm / unit: _____ Date: _____ By: _____

1. Pick a sunny bed or field
2. Clear residue and level the soil
3. Wet the soil before covering
4. Lay clear plastic tight at edges
5. Seal the edges with soil
6. Note start date and weather
7. Check plastic for tears
8. Remove plastic and record results

YOUR NOTES

TIP Solarization works best in hot sunny weather, so ask extension about timing and plastic type for your area.
