# Stored Grain Pest Management Guide

This stored grain pest management guide walks through steps to keep bins clean, check grain condition and monitor for insects so stored crops hold their value.

Farm / unit: _____ Date: _____ By: _____

1. Clean bins before filling
2. Seal bin openings and repair leaks
3. Fill with clean dry grain
4. Cool grain as conditions allow
5. Sample and probe on a schedule
6. Record insects or odors found
7. Act on problems quickly
8. Clean out and record after emptying

**YOUR NOTES**

**TIP** Check grain regularly, especially when seasons change, and ask extension for approved treatments if insects appear.
