Vineyard Disease Management Guide

Use this vineyard disease management guide to plan canopy care, scouting and treatments through the season, with steps to record disease signs and the actions you take.

Farm / unit: _____ Date: _____ By: _____

1. Record the block and variety
2. Prune for airflow
3. Manage shoots and leaves for light
4. Scout at key growth stages
5. Note disease signs found
6. Follow the label for any product
7. Remove diseased clusters or tissue
8. Record outcomes at harvest

YOUR NOTES

TIP Match your scouting to growth stages, and ask extension about local disease pressure each season.
