Poultry | WORKSHEET

Fertility & Hatchability Worksheet

A fertility and hatchability worksheet for working out how many eggs were fertile and how many hatched. Breeders use it to compare flocks and spot setting or incubation problems.

Farm / unit: _____ Date: _____ By: _____

Flock or breeder group _____

Date eggs were set _____

Total eggs set _____

Infertile eggs found at candling _____

Early dead embryos _____

Late dead embryos _____

Pipped but not hatched _____

Chicks hatched _____

Notes on incubator or storage conditions _____

NOTES / CALCULATIONS

TIP Break out unhatched eggs when possible, since the stage of death points to the cause. Your extension office can help interpret results.
