Poultry | TEMPLATE

Fly Control Plan for Poultry

A fly control plan template for poultry houses that lays out monitoring, prevention and treatment steps. Producers use it to keep fly numbers down with a written routine.

Farm / unit: _____ Date: _____ By: _____

House and area covered

Fly monitoring method

Moisture and manure control steps

Sanitation and cleanout routine

Biological control measures

Chemical control options and label notes

Record keeping plan

Staff responsible

Review and update schedule

TIP Moisture control is the base of fly management, and any product must be used exactly as its label directs.
