Poultry Cost of Production Calculator

A poultry cost of production calculator that adds up costs per bird, per dozen or per pound. Producers use it to price products and find where money goes.

Farm / unit: _____ Date: _____ By: _____

Product being costed _____

Number of birds or units _____

Chick or pullet cost _____

Feed cost _____

Labor cost _____

Utilities and fuel _____

Vet, medicine and supplies _____

Housing and equipment cost share _____

Total cost per unit _____

NOTES / CALCULATIONS

TIP Include your own labor and housing in the total so the price you set truly covers costs.
