# Farm EPA Inspection Preparation Guide

A guide to preparing a farm for an EPA inspection, used by owners and managers who want permits, chemical records and storage areas in order beforehand.

Farm / unit: _____ Date: _____ By: _____

1. Gather permits, plans and application records
2. Walk chemical storage and mixing areas
3. Check tanks, containment and signage
4. Review manure and runoff practices
5. Choose a contact person for inspectors
6. Ask what the inspector wants to review
7. Take notes and keep your own copies
8. Fix findings and record the corrections

**YOUR NOTES**

**TIP** Check with your state agency and extension office to learn which rules apply to your operation.
