Farm Hazard Communication Program Template

An outline for a written hazard communication program for a farm, used by owners who store or use chemicals and need to inform workers about labels, safety data and training.

Farm / unit: _____ Date: _____ By: _____

Purpose and scope of the program

Person responsible for the program

Chemical inventory location

Container labeling rules

Safety data sheet access

Worker training topics

Non-routine task procedures

Contractor and visitor information

Program review schedule

TIP Keep the written program where all workers can see it and update it when you add a new chemical.
