Farm Lockout/Tagout Procedure Template

An outline for writing lockout and tagout procedures for farm machinery, used by owners and mechanics to shut down and secure equipment before service. Fill it in with a pen and share it.

Farm / unit: _____ Date: _____ By: _____

Machine name and location

Energy sources to isolate

Shutdown sequence

Lock and tag placement

Stored energy release steps

Verification that equipment is safe

Restart and notification steps

Authorized workers list

Training and review notes

TIP Write one procedure per machine type and keep a copy at the machine or in the shop.
