Farm Manure Management Plan Template

An outline for a manure management plan on a livestock farm, used by owners to record storage, handling, hauling and field application. Fill it in with a pen, share it with your team, and store it with related paperwork.

Farm / unit: _____ Date: _____ By: _____

Animals and manure sources

Storage type and location

Handling and hauling equipment

Fields receiving manure

Manure test results

Application timing and method

Setbacks and weather limits

Spill and emergency steps

Records and review notes

TIP Have manure tested and ask NRCS or extension to help match applications to crop needs.
