Farm Nutrient Management Plan Template

An outline for a farm nutrient management plan, used by crop and livestock owners to record fields, soil tests, nutrient sources and application plans. Print it, fill it in on site, and file the completed copy with your records.

Farm / unit: _____ Date: _____ By: _____

Farm and field identification

Field maps and sensitive areas

Soil test results on file

Crop plans and yield goals

Manure and fertilizer sources

Application method and timing

Setbacks near water and wells

Record keeping steps

Plan review schedule

TIP Work with your NRCS office or a certified planner, and follow your state nutrient rules.
