Farm Organic System Plan Template

An outline for an organic system plan, used by farmers applying for or keeping organic certification. Review it with the people involved and update it whenever your operation changes.

Farm / unit: _____ Date: _____ By: _____

Farm and field descriptions

Land use history

Crops or livestock covered

Seeds and planting stock sources

Soil fertility and pest management practices

Approved input list

Buffer and contamination controls

Recordkeeping system

Commingling and handling controls

TIP Use your certifier template where required and update the plan when practices change.
