Farm OSHA Inspection Preparation Guide

A guide to preparing a farm for an OSHA inspection, used by owners and managers who want records, training and equipment ready before an inspector arrives.

Farm / unit: _____ Date: _____ By: _____

1. Gather written programs and training records
2. Walk the farm and fix visible hazards
3. Check guards, labels and extinguishers
4. Choose a person to host the inspector
5. Know your rights during an inspection
6. Take your own notes and photographs
7. Ask for explanations of any findings
8. Correct cited items and document the fix

YOUR NOTES

TIP Call OSHA or your state consultation program for a free visit before an inspection and ask about small farm exemptions.
