Poisonous Plant Identification Guide

A guide for finding and recording poisonous plants in sheep and goat pastures. Use it to scout fields and plan removal or avoidance. Follow the steps in order and keep the guide handy with your other farm papers.

Farm / unit: _____ Date: _____ By: _____

1. Learn local toxic plants from extension lists
2. Scout pastures each season
3. Photograph unknown plants
4. Mark and map plant locations
5. Keep animals away from hazard areas
6. Remove or manage plants per advice
7. Watch animals for poisoning signs
8. Call your veterinarian quickly if signs appear

YOUR NOTES

TIP Ask your extension office to confirm unknown plants before animals graze, and know that hungry animals eat more risky plants.
