Aquatic Weed Identification Guide

Guide for identifying aquatic weeds in farm ponds, with steps for sampling, photographing and choosing a control approach. Work through the steps in order and keep notes on what you find along the way.

Farm / unit: _____ Date: _____ By: _____

1. Walk the shoreline and note plants
2. Photograph each plant
3. Collect samples with care
4. Compare with an extension plant guide
5. Note where each plant grows
6. Check for invasive species rules
7. Choose control options
8. Read any product label first
9. Record results details

YOUR NOTES

TIP Send photos or samples to your extension office for identification before using any treatment.
