Controller Programming Guide

Guide to programming irrigation controllers, covering schedule setup, sensor inputs and backups. Work through the steps in order and keep notes on what you find along the way.

Farm / unit: _____ Date: _____ By: _____

1. Read the controller manual
2. Record current settings
3. Set clock and date
4. Create zones and names
5. Set start times and run times
6. Add sensor or rain inputs
7. Test each station
8. Save a backup of settings
9. Review and adjust through the season

YOUR NOTES

TIP Write down the settings before any change so you can restore them if needed.
