Cover Crop Seeding Rate Chart

Chart for recording cover crop seeding rates by species and method, so each field gets the right amount of seed according to local guidance and the seed tag.

Farm / unit: _____ Date: _____ By: _____

1. List species in the mix
2. Look up local seeding guidance
3. Read the seed tag for purity and germination
4. Note the seeding method
5. Adjust for mix or broadcast versus drill
6. Calibrate the seeder per the operator's manual
7. Record seed lot and supplier
8. Note field conditions at seeding
9. Review stand results

YOUR NOTES

TIP Write down the seed lot on every field so you can trace poor stands back to a source.
