# Cover Crop Species Selector

Selector chart for choosing cover crop species by purpose, planting window, termination method and fit with the cash crop that follows. Work through the steps in order and keep notes on what you find along the way.

Farm / unit: _____ Date: _____ By: _____

1. Name the main goal for the cover crop
2. Note the cash crop before and after
3. Check seeding window for your area
4. List species that meet the goal
5. Consider termination method and timing
6. Check seed cost and availability
7. Match seeding equipment to species
8. Decide on mixes or single species
9. Record the choice and results

**YOUR NOTES**

**TIP** Check your local extension cover crop guide before ordering seed, since species fit varies a lot by region.
