Emergency Water Storage Guide

Guide to storing emergency water for farm and household needs, covering containers, treatment and rotation. Work through the steps in order and keep notes on what you find along the way.

Farm / unit: _____ Date: _____ By: _____

1. Estimate water needs for people and animals
2. Choose food safe containers
3. Clean containers before filling
4. Fill with safe water
5. Add treatment per its label
6. Label with date
7. Store away from chemicals and heat
8. Rotate stored water on a schedule
9. Record locations details

YOUR NOTES

TIP Store water in a cool, dark place, and check containers on a regular schedule.
