Greywater Irrigation Guide

Guide to using greywater for irrigation, helping users understand safe sources, local rules, system parts and plant choices. Work through the steps in order and keep notes on what you find along the way.

Farm / unit: _____ Date: _____ By: _____

1. Check local and state rules first
2. Identify safe greywater sources
3. Avoid harmful soaps and chemicals
4. Plan how water reaches plants
5. Choose plants and areas that suit it
6. Keep water away from edible parts
7. Install and label pipes clearly
8. Inspect for clogs and pooling
9. Record use and results

YOUR NOTES

TIP Check with your state health department before using any greywater system. Local rules differ, so ask first.
