Irrigation Scheduling App Setup Guide

Guide to setting up an irrigation scheduling app, from collecting field data to entering soils, crops and weather sources. Work through the steps in order and keep notes on what you find along the way.

Farm / unit: _____ Date: _____ By: _____

1. Choose an app suited to your crops
2. List fields and their sizes
3. Enter soil types
4. Enter crop and planting dates
5. Choose the weather data source
6. Enter irrigation system details
7. Compare recommendations with field checks
8. Record irrigation applied
9. Review and adjust each week

YOUR NOTES

TIP Check the app's advice with soil probe or moisture sensor readings before you rely on it.
