Solar Water Pumping Guide

Guide to solar water pumping on farms, explaining the main parts, planning questions and steps to follow before buying a system. Work through the steps in order and keep notes on what you find along the way.

Farm / unit: _____ Date: _____ By: _____

1. Define water needs and uses
2. Find source depth and flow
3. Choose a pump type with a supplier
4. Plan solar panel location
5. Plan storage tank and distribution
6. Review controller and safety parts
7. Plan installation with a qualified installer
8. Plan maintenance details
9. Record system details

YOUR NOTES

TIP Get quotes from more than one installer and ask for references from similar farms.
