Fly Control Plan for Swine

This Fly Control Plan for Swine gives swine producers an outline for planning fly control around swine buildings. Fill in each section for your own operation, share it with those involved, and update it when things change.

Farm / unit: _____ Date: _____ By: _____

Sites where flies breed

Sanitation tasks and who does them

Manure and spilled feed handling

Moisture and drainage fixes

Monitoring method such as traps

Product choices per label and advice

Natural enemy options

Rotation of control methods

Record of results

Review date

TIP Start with sanitation and moisture control, and read every product label before using any treatment.
