Disease Forecasting App Setup Guide

A guide for setting up a plant disease forecasting app, helping growers choose a source, enter fields, and link each alert to a scouting step.

Farm / unit: _____ Date: _____ By: _____

1. Choose a forecast source your extension office trusts
2. Create an account and store the login safely
3. Enter fields, crops, and planting dates
4. Select the diseases to follow
5. Connect a weather source
6. Set alert preferences
7. Scout when an alert arrives
8. Record what you found

YOUR NOTES

TIP Pair every alert with a field check, and ask your extension agent which models suit your crops and region.
