Farm Cell Signal Booster Guide

A guide for farms considering a cell signal booster, helping owners test signal, pick a location, install according to the rules, and check the result.

Farm / unit: _____ Date: _____ By: _____

1. Test signal in the house and shop
2. Record where calls drop
3. Check your carrier's booster rules
4. Choose a booster approved for use
5. Pick an outside antenna location
6. Install per the maker's instructions
7. Retest signal in each area
8. Keep the receipt and registration

YOUR NOTES

TIP Check with your carrier before buying, since boosters often have to be registered with the provider.
