Farm Technology Ethics Guide

A guide to ethics in farm technology, helping owners think about data use, privacy, fairness, and effects on workers and neighbors. Print it and keep a copy with your records.

Farm / unit: _____ Date: _____ By: _____

1. Name who is affected by the technology
2. Ask who owns the data
3. Be open with workers about monitoring
4. Respect neighbors and privacy
5. Check for unfair effects
6. Plan for errors and failures
7. Keep humans in charge of decisions
8. Review choices each year

YOUR NOTES

TIP Discuss these questions with employees and neighbors before installing cameras or tracking tools.
