Farm Wi-Fi Network Setup Guide

A guide for setting up a Wi-Fi network around a farmstead, helping owners plan coverage for the house, shop, and barns and secure the network.

Farm / unit: _____ Date: _____ By: _____

1. Map buildings that need coverage
2. Find where the internet line enters
3. Choose a router and any extenders
4. Place equipment off the floor and dry
5. Change default router logins
6. Set a strong network password
7. Create a separate guest network
8. Test signal in each building

YOUR NOTES

TIP Test coverage in each building before running cable to the final spot, and ask your provider about outdoor-rated equipment.
