Field Boundary Mapping Guide

A guide for mapping field boundaries with GPS, helping operators drive or walk edges, name fields, and save clean boundary files. Print it and keep a copy with your records.

Farm / unit: _____ Date: _____ By: _____

1. Decide how each field will be named
2. Charge and test the GPS unit
3. Drive or walk the boundary slowly
4. Record points around obstacles
5. Close the boundary and save it
6. Check the area against farm records
7. Mark waterways and no-spray zones
8. Back up the boundary files

YOUR NOTES

TIP Use the same field names across all your apps so records match up later.
