Frost Monitoring Alert Setup

A setup guide for frost alerts, helping growers choose a sensor or forecast source, set alert contacts, and plan what to do when an alert arrives.

Farm / unit: _____ Date: _____ By: _____

1. Decide which crops and fields need alerts
2. Choose a sensor or forecast service
3. Place sensors in your coldest spots
4. Set alert methods and phone numbers
5. Test the alert with a trial message
6. List who responds and what they do
7. Keep a log of alerts received

YOUR NOTES

TIP Test the alert before frost season and keep a backup contact in case the first person cannot respond.
