IoT Device Management Log

A log for managing internet-connected devices on the farm, helping owners track updates, passwords changed, and problems for each device. Print a copy, fill in each row as the work happens, and keep the sheet with your records.

Farm / unit: _____ Date: _____ By: _____

Date	Device	Location	Update done	Problem	Initials

TIP Change default passwords when you install any new device and note that here, but never write the password itself.
