# RTK Correction Service Setup

A guide for setting up an RTK correction service for tractors, helping owners choose a source, enter settings, and check that the signal holds. Print it and keep a copy with your records.

Farm / unit: _____ Date: _____ By: _____

1. Choose a correction source with your dealer
2. Confirm coverage on your farm
3. Create the account
4. Enter the service login in the receiver
5. Set the correct mount point or channel
6. Wait for a fixed solution
7. Test a pass against a known line
8. Record settings and contacts

**YOUR NOTES**

**TIP** Write down the settings in the cab so any operator can restore them after an update or reset.
